Step 3 : Enter the name of repository and click on public to be visible to all

Enter the name here

Owner ^{*} Repository name ^{*}

chmarshal /

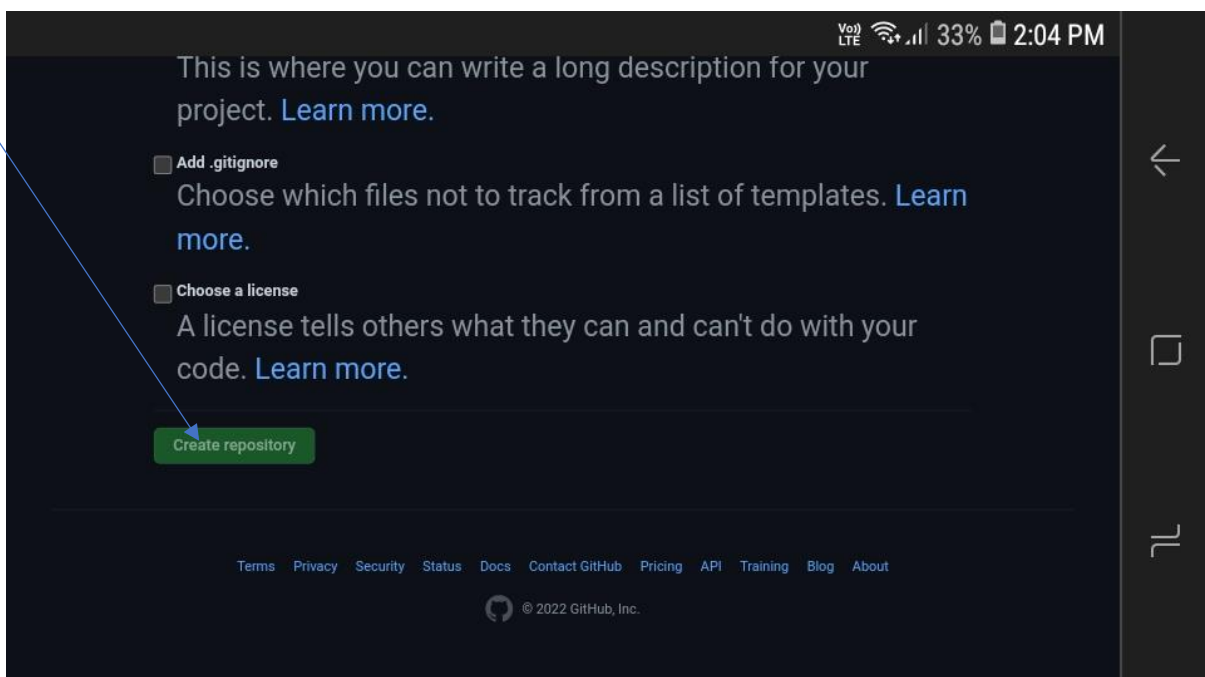

Great repository names are short and memorable.
Need inspiration? How about **didactic-pancake**?

Description (optional)

☒ **Public**
Anyone on the internet can see this repository. You choose who can commit.

☐ **Private**
You choose who can see and commit to this repository.

Step 4 : Click on create repository

This is where you can write a long description for your project. [Learn more.](#)

☐ **Add .gitignore**
Choose which files not to track from a list of templates. [Learn more.](#)

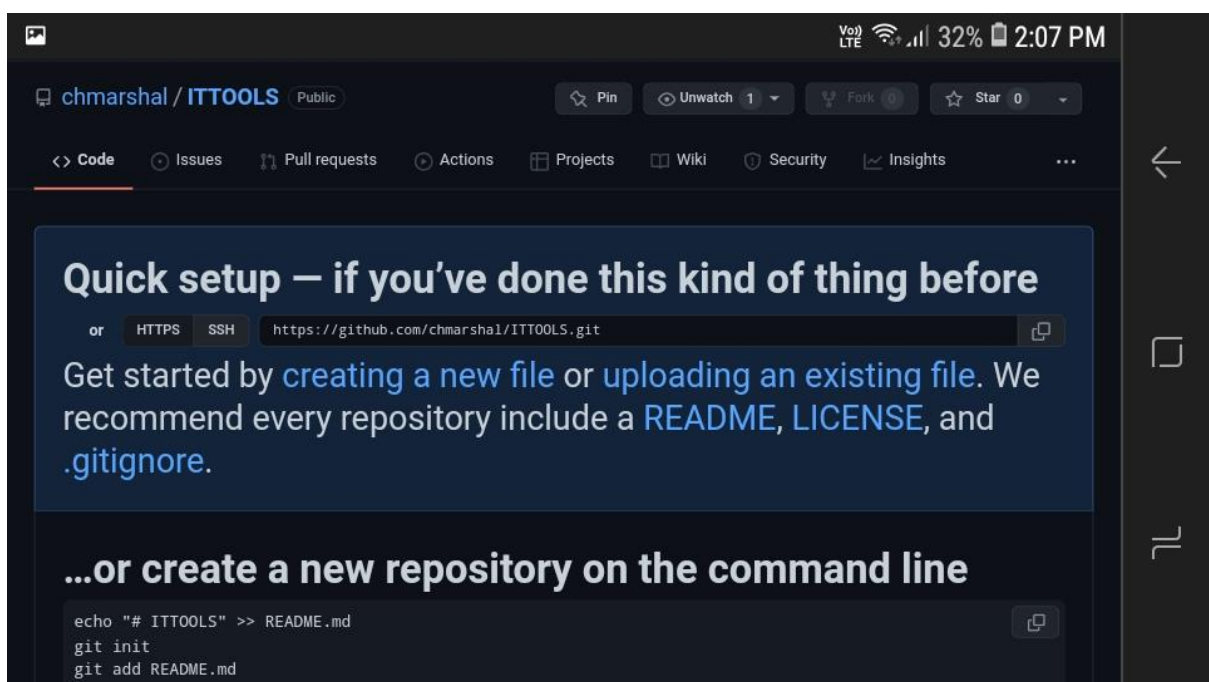

☐ **Choose a license**
A license tells others what they can and can't do with your code. [Learn more.](#)
